What I Have Learned From the Student Mobility Scheme

This period of time was the most unforgettable experience in my life. Not all of students have this kind of chance to exchange to a foreign country, learn with foreign students, and experience the foreign culture during the college life.

In the goal of my life, I want to change my studies from Sociology to Hotel Management. Unfortunately, at my school, Soochow University, don't have this criterion of study. So, Christian University of Thailand offers me this change to step into this grooming study. After learning three courses of Hotel and Tourism Management, I've made up my mind to further my studies in this field.

Lots of Taiwanese student likes to exchange to Western countries, such as United States of America, United Kingdom, or France, to name but a few. But I have a different idea with them. If wanting to devote myself in travel industry, I have to get the experience from an Asian country instead of an American or European country. That's why I choose to Thailand.

I was the first exchange student in this school, Christian University of Thailand; so they tried to treat me as nice as they can. So, I'm very lucky. During schooldays, I learned lots of knowledge in class. After class, I learned how to live and get along with Thai students. Also, I've learned some daily talks

or vocabulary of Thai.

In Thailand, the school provided lots of activities and field trips for students; they want their students to learn from the process, not only from lectures. That is an extremely difference from Thailand and Taiwan. During these periods of time, I had several experiences to have a field trip with my Thai classmates, especially the trip to Northeastern Thailand and Cambodia. It's a three days and two nights' trip, I have to learn how to live with Thai Student from day to night. We can tell apart the different customs and lifestyles, but we try our best to get along with each other.

I'm not only learning knowledge during these three months, but also making lots of friends in Thailand. They don't want any feedbacks or benefits, they just want to take good care of me, and make friends with me. Especially, one staff in International College Office called Jandy, she always took care of my life and study; and treated me as her little brother. Every time after I took the mid-term or final exam, she always asked her friends to take me to have a big meal in downtown for relaxing. Every time I felt happy or sad, she was the one listened to me and shared feeling with me. Also, her brother took me to attend the Songkran Festival (Thai New Year) in Bangkok. That was one of the most unforgettable memories of my life.

Lastly, I want to thank for ACUCA giving me this chance to exchange to Thailand. Also, Steffie in Soochow University helped me a lot to apply this exchange program; Jasmin, Ronnel, Jandy in Christian University of Thailand handled lots of things for me from school to daily life. And, everyone, I met during this period of time, makes my life more colorful. Thank you all.
